

SOVEREIGN™

THE SOVEREIGN OCCUPATIONAL PENSION SCHEME

Delivering solutions with experience and expertise

THE CHANGING LANDSCAPE

The good news is that we are all living longer. “Generation X” (1966-1980) life expectancy is 87* years however “Generation Z” (2001-2015) could well live to 100 years old.

With an ageing population and longer lives, Governments are already delivering change through pensions’ auto-enrolment programmes to help people prepare.

Appropriate retirement planning and pensions are more important than ever and employers are shouldering the burden to help their employees accumulate wealth for retirement in a tax-efficient manner.

In the future, a workforce could have four generations within the population and as HR teams are becoming more stretched and looking for support, the Sovereign Group can help you meet the challenges with a tried and tested cost-effective and efficient solution.

MEETING THE CHALLENGES OF THE 21ST CENTURY WORKFORCE

A successful compensation strategy is an important consideration for any employer wanting to drive their business forward and who is looking to attract and retain the best talent.

Most employees now regard retirement provision as a key part of their remuneration package. So after all that hard work and expense to attract staff, you need to develop and retain them and provide a benefit that is meaningful.

There are the added challenges of a finite working population and auto-enrolment on the horizon while HR teams are becoming more stretched to deliver within deadlines and budgets and so are looking for support.

“ It is a challenge to fulfil the
needs of employees ”
